PRESENTED BY

COMMUNITER BONA PROFUNDERE DEORUM EST.

For like false friends they will soon  
or later betray me —

Gent-

I propose to call your attention  
to day - to the practical application  
of the Remedies of our Art. to the  
Cure of Morbid Symptoms. and their  
Combinations - Constituting what  
~~the~~ indefinite nomenclature of  
Nosology Calls - Specific - or Particular  
Disease - or Diseases In This path-  
gent - you have more than once  
patiently followed me - I have humbly  
- tho' earnestly endeavoured to clear  
away the hindrances to your progress -  
and I trust you have not found  
the pursuit a tedious or difficult  
one - So slightly devious - has it  
been my aim - to make your path  
of instruction - that let us now  
try - if we cannot find the place  
whence we started - and without  
inconvenience return again -

I have - No - Theories to Support -  
Gent -

+ I never saw Pleurisy - written on a patient's side - I never saw Gastritis written upon a patient's Stomach

+ Induction - knows where to begin and where to end -

" They begin by supposition - which if granted - they prove the Rest  
Remember Stoichemides -

I am here - under no allegiance to  
Men's Opinion - All I aim ~~at~~ in  
Medicine - is to be an humble  
observer - and ~~as far as~~ as I can -  
be - a faithful Translator of Na-  
ture - Hence allow me to speak  
of Morbid Symptoms - and their various  
Combinations - This is all <sup>the human body</sup> ~~the human body~~  
in disease has Ever shown - me - and  
it is all - she has Ever shown - to others -  
I ask nothing Else & Nature is liberal  
- whilst she will not be forced in her  
Chautus - Our Avarice - our ambi-  
-tion - covets more from her than she is  
willing to give - and This is Ever the  
Resort of Theory - it asks more than  
it can get - Prefiged to such  
published Speculations - you may  
often see - The useful - The truly  
Scientific term <sup>name</sup> of Induction - taken  
in vain - but what follows is  
the very antipodes of Induction -  
What <sup>has</sup> Made - Frankins name immortal

What has conferred an honor upon the  
country which gave him birth —  
- His discovery from induction - what  
did he discover - what did he invent -  
a new Theory so called - any fine Specu  
lative hypothesis - any splendid Effusion of the  
imagination (better to befit the Region of  
fiction - and Romance) - by which mankind  
have been dazzled and Rob'd of their Senses -  
He - only (Simple as it may seem) clarified  
the Resemblances of lightning - and Electricity  
It was Induction that Affected it —

See the Motto which Posterity has bestowed  
by crown'd him with -  
"Eripuit Fulmen - Caelo - Septuaginta  
Tyrannus" - Septuaginta Tyrannus -  
Yes Gent - he not only wrested the  
Political Scepter from the hand of a Tyrant -  
but he overthrew - the Tyranny of Theory  
and Science owns him as a triumph  
ant Conqueror - But to the Subject  
proper of our Lecture - Call it not  
altogether Digression - For I trust I can

When I like the rest of the fools of this good  
city, talked in my lecture room about the Cholera.  
They called me Crazy - because, I said  
don't be scared - you can cure it by the  
same means - the same "principles" as  
you have cured other violent epidemics  
and so it fell out - vide "Doctor Chapman's  
letter to Doctor Tyler of Maryland"

October 1832.

illustrate the very principles I have just  
glanced at. In what I have yet to tell  
you - -

Now for Cholera Morbus -  
in its different grades - or conditions -  
Before proceeding any further what  
do we mean by the term -

Define it -

Its various symptoms - and because  
of its various symptoms - as takes  
place in all other diseases. Notolog-  
ically so called - the mistake as to its  
nature -

Treatment -

Attend to the State of the system -

Journal of the  
Exploration of the  
Great Salt Lake

This is a copy of the original  
manuscript of the journal of the  
exploration of the Great Salt Lake  
by the United States Army  
in the year 1845. The journal  
was written by Captain Wm. H.  
Perry and is a valuable  
source of information  
concerning the  
geography and  
history of the  
Great Salt Lake  
region. The journal  
contains a detailed  
description of the  
lake and its  
surroundings, and  
also contains  
information  
concerning the  
Indian tribes  
who inhabit the  
region. The  
journal is  
written in a  
clear and  
concise style,  
and is  
well  
illustrated  
with  
sketches of  
the lake and  
its  
surroundings.

Now for Asiatic Spasmodic  
Cholera -

June 29<sup>th</sup> 1832,

This Scourge of Europe - This  
Recent dread of America - What is  
it - that has struck such Panic -  
in the hearts of Americans - Not many  
years since - a hostile and powerful  
foe - landed with his legions upon  
our shores - and with asperate threat-  
nings - combined with matchless disci-  
-pline - resolved upon our destruction -  
not only upon the death of the dissolute  
and the drunkard - but <sup>upon</sup> fire - and Murder  
for all who would not submit -  
May more - Remember when he  
landed at Orleans - virtue - Honor  
property - Every thing which Man  
holds dear - was to be destroyed -  
Remember his "watch word" -  
"Beauty and Booty" - Even the virtue  
of America's lovely Daughters - was  
promised - as food for this Infernal  
Pestilence - and how did the hearts

Q  
Whence arises this Panic - First  
the name - Tia. Nosology. its indef-  
inite Nomenclature - its Theories -  
and I must add it. Nonsense  
which creates ignorance of its  
real nature - which consists  
only of symptoms - symptoms  
observed a thousand times even  
by those who think they  
do not understand its nature -

Yes consists of symptoms - or else it  
exists not as a disease & these symptoms  
to be cured will involve the same  
general principles - <sup>the same</sup> ~~and~~ Remedies used  
in the treatment of many other diseases  
[with which Physicians are familiar  
namely. Bleeding. Purging. Ricking  
Sweating. Rubefacient &c]

of America's Louis beat then — Did their  
Hearts beat with — Fear — did the blood  
circulate in their veins — or did their  
Muscles quiver — with abject — or dis-  
gaceful — Terror — No — Gert — they  
Saw — they heard — the symptoms — and  
knew the Remedy — They attended to  
the State of the Enemy — and  
prescribed accordingly — ~~Spasmod.~~

What then is this Asiatic Cholera —

<sup>and that</sup>  
Do not be frightened with the Name  
the word — It is not a terrible one  
by any means — not half as  
hard to pronounce — nor half as  
frightful — ~~and~~ many of those  
unmeaning terms — which Scholas-  
tic rules — have made you famil-  
iar with — Such as Pectoralogue —  
Hypertroph — Agaphay — and some  
more of them —

Let us Examine the Symptoms —

Veratrum &. Nonsense about Specimen  
for such a disease. You might as  
well in Agriculture - say that the  
sythe was the instrument to put  
away you hay - the sythe cuts the  
grass to be sure - but work is to be  
done about the <sup>tying</sup> making - Cocking -  
putting into the wagon - housing it &c.

Sudden Collapse - Pulsless Warts -  
Cramp in Stomach - Limbs - Vom-  
iting - Headach - Suppression of Urine -  
Difficult Breathing -

Look at Hahnemann - Description -

Objection to all these Stages -

being Cholera - various Morbid  
Symptoms - and that all -

General Remarks - in Conclusion  
the Ascatari -

Bag of Wind - with the breath  
of Theory - and Contradictory opinions  
of Science -

If ever Medical Mumbo had a rich benefit  
it had one this season. in shape of. and through  
the agency of the Cholera. Oh shades of departed  
Medical Sagacity how gracious would a visit  
from you have been -

Sept 1832 -

I will bet a plum. that if the Cholera does  
make its appearance in this City again, as has  
been promised by some of our "Physicians in Chief"  
it will make more fools of the Doctors - than  
Coppers of the public -

Sept 1832.

Remedies for Asiatic Cholera (so called)  
gracely recommended by some of the most  
Eminent and Scientific Physicians of  
Phila<sup>da</sup>

Injections of Salt and water in to the Reins!

do — of Ammonia — and Brandy!

— do — of Injections of Tobacco into Rectum

3 to 5 or 10 drops!! of Camphorated Spirit <sup>Full</sup> <sub>1/2 to 1/4</sub>

Steam — Tourniquet —

Burning Ether upon the Epigastric Region —

Ginger Nutr!!!! Helmet Cords in the  
Rectum — Total abstinence from

Purgative Medicines — See Belly

Pain — as made by Mr Harned — weighs

7 Pounds — (no doubt now very cheap)

Charles Lewis Sprague  
Hydroman, Jr.  
N. Carolina

Alas - we do then begin again with about  
and do precise terms <sup>with</sup> - No - they could  
obtain his symptoms - and will know their  
names - they attend to the state of  
the enemy, and - provide accordingly -  
- when then arises the pain -  
In some the name, acute pharyngitis  
Cholera - In some modern systems of  
physiological explanations - with their  
indistinct - and in meaning phenomena -  
- <sup>their opinion and their friends</sup> ignorance of the real nature  
- which consists only of mere combinations  
of old and well known terms or symptoms  
- symptoms observed a thousand times,  
- (though the often with reference to the  
authority of particular ~~theoretical~~ <sup>system</sup>)  
by those who think they do not understand  
- <sup>the nature of</sup> ~~it~~ <sup>is</sup> slender to say we  
do not understand this disease - and as the  
association of our symptoms - I will admit that  
this disease is acute pharyngitis <sup>only</sup> of symptoms  
- then - or else it is not a human disease  
as a disease - then symptoms to be described

*(Faint handwritten notes, possibly bleed-through from the reverse side)*

"I shall conclude the present lecture by  
men with a few remarks upon the  
Shametic Chorus, & call - the denings of  
Europe. This recent dream of America  
what is it - that has struck such panic into  
the heart of Americans? Not many  
years since a hostile and perilous foe  
lashed with his legions upon our shores  
and with desperate thrustings - combined  
with matchless discipline, hurled upon  
our destructing - not only upon the death  
of the dispirited and the dunces - but upon  
the rank of all who would not submit -  
may more - Remember when he landed at  
Orleans - Antioch - Boston - Postville - Every  
thing that man holds dear - was to be  
"sacrificed" - Remember his "travels"  
"Deadly" and "Deadly" - Even the virtue of  
the slaughter of America - was the prom-  
ise good of his Imperial Politics -  
the heart of the heart of America's  
own heart then - did they beat with  
fear? did the blood curdle in their
